AMMAR MAQSOOD

AI-NATIVE FULL-STACK DEVELOPER · AI AGENTS & AUTOMATION

Portfolio: ammarmaqsood.vercel.app ↗

01 / SUMMARY

Full-stack developer with **4+ years** shipping web and mobile products in **Node.js, React, Next.js and PHP**, now working AI-native: I plan in specs, build with **Claude Code, Codex and Cursor**, and ship production **AI agents and automations** on n8n, Make.com and custom OpenAI / Anthropic integrations. Former team lead who owns a product end to end, from requirements calls with international clients to CI/CD and the server it runs on.

02 / EXPERIENCE

FULL-STACK & AI AUTOMATION DEVELOPER

Feb 2026 – Present

The Plum Tree Group · digital agency, remote team

- **ProspectIQ**, an AI lead-research product (Node.js, TypeScript, React, OpenAI, GoHighLevel API): clients describe buyers in plain words, GPT turns it into a structured search, and ticked leads land in the CRM as companies, contacts, notes and deals. Multi-client admin, credits, scheduled finders. Rebuilt from PHP to v1 in a day; 30 feature releases in ten days on GitHub Actions deploys.
- Designed and shipped a **72-node n8n AI agent** for a mortgage lender: transcribes every sales call with Whisper, summarises it with GPT-4o against the full contact history, updates opportunities across pipelines, posts notes and drafts follow-up and nurture emails. Live since October 2026, iterated v2 → v6.
- Built an **AI weekly reporting analyst** (PHP 8, Claude / OpenAI, SQLite) that narrates CRM metrics for every client, with a hard guardrail: the model only narrates numbers computed in code.
- Built **Stale Lead Reviver** (Node.js, React, Supabase, GPT-4o): finds dormant contacts, drafts re-engagement messages in the client's voice, human approval queue, AI reply classification.
- Delivered the integrations around the CRM: **FedEx shipping** with tracking write-back, **ZoomInfo enrichment**, **Make.com → Smartsheet** sync, an e-signature → certificate pipeline, an affiliate revenue-share dashboard, a **LinkedIn outreach engine** (Node.js, Postgres, Playwright) and a review aggregator (React 19, Express 5, n8n, Apify).
- Run an **AI-native workflow** across the team's repos: context files, custom skills, MCP servers and token budgeting, so agents stay within limits and output stays reviewable. Own delivery: GitHub Actions → VPS (nginx, pm2), Docker, Vercel; docs and a changelog line with every feature.
- Also: prompt-engineered chatbots and voice agents in GoHighLevel, a custom Student Management System, WordPress builds and migrations.

WORDPRESS FULL-STACK DEVELOPER → TEAM LEAD

Feb 2024 – Feb 2026

Glixen Technologies · WordPress product company

- Developed custom WordPress themes and plugins for **AdForest, Exertio, DWT Listing, Nokri, Propertya and Carspot**, including the AdForest REST APIs behind the React Native and Flutter apps.
- Promoted to **Team Lead**: sprint planning, daily stand-ups and code reviews for the development team in an Agile environment.
- Delivered custom themes for key client DeepFunding (deepfunding.ai, community.deepfunding.ai, singularitynet.io) and led requirement and progress calls with international clients.

AI & VIBE-CODING TOOLKIT

CODING AGENTS

Claude Code · OpenAI Codex · Cursor · Lovable · ChatGPT · Claude · MCP servers

AGENT WORKFLOW

Context files (CLAUDE.md / AGENTS.md), custom skills & slash commands, subagents, plan-then-execute, token & cost budgeting, model routing, knowledge graphs for codebase navigation.

AI PLATFORMS & APIS

n8n · Make.com · OpenAI API · GPT-4o · Whisper · Anthropic API · Prompt engineering · Structured JSON output · Conversation & Voice AI

CORE SKILLS

FRONTEND

React, Next.js, Vite, TypeScript, Tailwind CSS, shadcn/ui, Framer Motion, Redux, React Native

BACKEND

Node.js, Express, TypeScript, PHP 8, Laravel, Python, REST APIs, webhooks, cron & schedulers

DATA

PostgreSQL, Prisma, Drizzle, Supabase, MongoDB, SQLite, Zod

INFRA & DELIVERY

Git & GitHub, GitHub Actions, Docker, pm2, nginx, VPS, Vercel, AWS, Firebase, Playwright, FFmpeg

CRM & INTEGRATIONS

GoHighLevel API & workflows, ZoomInfo, Apollo, FedEx, Smartsheet, Google Places, Apify

WAYS OF WORKING

Agile / Scrum, Jira, Asana, Monday.com, Trello; remote and async with international clients

02 / EXPERIENCE, CONTINUED

SOFTWARE ENGINEER

Sep 2022 – Aug 2023

Arrivy Inc. · field-service software

- Built React Native mobile apps and Laravel / PHP + React web applications with third-party API integrations.
- Contributed to Agile delivery through sprint planning and code reviews.

03 / SELECTED AI & AUTOMATION PROJECTS

PROSPECTIQ — IN PRODUCTION

Plain-words lead research: GPT reads the request, a research database answers, every lead gets a reason it fits, ticked leads are pushed into the CRM. Daily finders, credits, targeting, multi-client admin.

Node.js · TypeScript · React · OpenAI · GoHighLevel API · GitHub Actions

CALL PROCESSOR AGENT — IN PRODUCTION

n8n agent for a mortgage lender: Whisper transcript, full-history GPT-4o summary, opportunity updates across pipelines, notes, follow-up and nurture email drafts. Idempotent, 72 nodes.

n8n · GPT-4o · Whisper · GoHighLevel API

WEEKLY REPORTING ANALYST — PILOT

Monday-morning narrative report per CRM client. Metrics pulled and compared in PHP; Claude only narrates. Encrypted keys, idempotent weeks, mock mode.

PHP 8 · SQLite · Anthropic API · OpenAI API

STALE LEAD REVIVER

Daily scan for dormant contacts, GPT-4o drafts in the client's brand voice, human approval queue, inbound webhook classifies replies and stops the sequence.

Node.js · React · Supabase · OpenAI API

CLIPFORGE — PERSONAL

YouTube link → reviewed 9:16 clips with karaoke captions. yt-dlp, FFmpeg, Whisper word timestamps, GPT scoring with structured output; every API call metered (≈ $0.37 per hour of video).

Node.js · Prisma · PostgreSQL · React · FFmpeg · Docker

REVIEW AGGREGATOR — IN PRODUCTION

Google reviews scraped through an n8n workflow and Apify, analysed in a React 19 dashboard. OpenAPI-first with generated hooks and Zod validators.

React 19 · Express 5 · Drizzle · n8n · Apify

LINKEDIN OUTREACH ENGINE

CRM smartlist in, paced connection requests and follow-ups out via a Playwright worker on a clean residential IP; replies pushed back as warm leads. Caps, work-hours gating, IP-drift auto-pause.

Node.js · PostgreSQL · Playwright · Docker

FITTRACK AI — PERSONAL

Offline-first fitness PWA with a deterministic coach. 36 specification documents written first, then built phase by phase with coding agents.

React · TypeScript · PWA · IndexedDB

HOW I WORK WITH AI

Spec first. Goals, data shapes and API contracts go into the repo before the first prompt.

Context, not re-explaining. Every repo carries a CLAUDE.md / AGENTS.md and a project-context file, so a fresh session starts warm and tokens go to the work.

Scoped tasks, delegated searches. Big jobs are split into small ones, long explorations go to subagents, and repeat work becomes a skill or slash command.

Right model for the job. Cheaper models for routine edits, the strongest for architecture; AI spend metered in the products I build.

Review everything. Agent output is a draft until it typechecks, passes tests and runs locally.
